Colorado State Committee Meeting – June 24, 2026

Executive Session Minutes

Meeting Place:	Via TEAMs
Members Present:	Don Brown, Chairperson Kyle McConnell, Member (Via Teams) Steve Raftopoulos, Member Joe Petrocco, Member Darrell Mackey, Member (Via Teams)
Staff Present:	Jerry Sonnenberg, State Executive Director Jon Weishaar, Deputy State Executive Director Cindy Vukasin, Farm Program Chief Janae Rader, Farm Program Specialist Doug Andresen, Farm Program Specialist Hunter Cleveland, Farm Program Specialist Julie Sporhase, Farm Program Specialist Woody Woods, District Director Sam Montoya, District Director
Guests:	Eric Hanagan, Appellant – Appeal only (Via Teams) Dara Belew, CED – for Otero/Crowley COC items only (Via Teams)

---

1. Call to Order

The Colorado State Committee (STC) met on June 24, 2026, in person at the FSA State office and via TEAMs. Don Brown, State Committee Chairperson opened the Executive Session at 9:05 a.m.

2. Approve Executive Session Minutes

A May 28, 2026, Minutes

The STC reviewed the Executive Session minutes from the May 28, 2026, meeting. After reviewing the minutes, Steve Raftopoulos made a motion to approve the minutes as presented. Joe Petrocco seconded the motion. Motion passed.

3. Noninsured Crop Disaster Assistance Program (NAP)

A Reconsideration/Appeal – Otero – Eric Hanagan and Kimberlee Hanagan

Janae Rader, Farm Program Specialist, presented the STC with the administrative record (Exhibit 1) for this appeal ahead of the scheduled informal hearing and gave a summary of the matter.

Matter under Review:

The State Committee (STC) will review the request for reconsideration on Otero County Eric Hanagan and Kimberlee Hanagan (Appellant) denial of the 2025 NAP CCC-576 Part G through H (application for payment) filed December 1, 2025, due to a disapproved CCC-576 Part B (notice of loss). The Colorado FSA State Committee (STC) disapproved the notice of loss on February 11, 2026, and subsequent application for payment on April 23, 2026. The Appellant has requested STC to reconsider their previous determinations.

Appellant's Position:

The appellant requested reconsideration as he maintains the lack of irrigation water was caused due to drought and was severe enough to directly impact his crops, the lack of irrigation water is a direct result of drought conditions and therefore an eligible cause of loss. In addition, the Appellant claims his intent to plant is fully supported as of the final plant date resources required to plant were on hand and preparatory actions for planting were completed prior to the crops final plant date.

During the hearing the appellant also asked the following questions in support of his position.

1. How does the documentation provided do not meet drought requirements?
2. Was the STC decision only based on the drought monitor and an meeting a D3?
   Was the drought monitor the only thing that was looked at? Did the STC look at the other weather data provided.

Issue:

1. Did the Colorado STC make a proper determination when disapproving the CCC-576 Part B, notice of loss filed June 16, 2025, on irrigated cantaloupe and irrigated peppers Ana with the intended use of fresh on unit 2089 with a claimed disaster event of drought, other (lack of water) beginning December 20, 2024, and continuing through final plant date.
   a. Did the claimed disaster conditions occur during the coverage period?
      1) Did the claimed drought directly cause, accelerate, or exacerbate destruction or deterioration of the crop?
      2) Is lack of irrigation water "Other (lack of water)" an eligible claimed disaster event, due to a qualifying drought?
         a) Is there documentation of adequate water?
   b. Was the drought present and severe enough to be considered an eligible cause of loss?
   c. Did the drought monitor exceed the D2 threshold in Otero County on the final plant date?
   d. Was any portion of the claimed loss because of any ineligible causes of loss?
   e. Did the appellant establish intent to plant?

2. Did the STC make a proper determination when disapproving the CCC-576 Part I application for payment?

Finding of Facts and Analysis:

The STC reviewed all pertinent facts of this case and with consideration of the producer's testimony supplied at the June 24, 2026, appeal hearing, the STC determined the following:

The documentation provided does not establish that the claimed eligible weather-related disaster event occurred during the coverage period or that it directly caused the claimed crop loss as opposed to other circumstances. In addition, the requirements for irrigated prevented planting were not met.

1. **Ineligible Cause of Loss during the Coverage Period.**
   a. **Drought is Not Supported as an Eligible Cause of Loss**
   Although drought is an eligible cause of loss under 1-NAP paragraph 51 and 7 CFR 1437.10 (b)(1)(i), the documentation provided does not substantiate that a drought event:
      - occurred during the applicable NAP coverage period,
      - directly impacted the affected acreage, or
      - was severe enough to meet NAP drought criteria under 1-NAP, subparagraph 51E.

   The STC reviewed the weather data including precipitation data from National Oceanic and Atmospheric Administration (NOAA), National Centers for Environmental Information (NCEI) showing near normal precipitation from January 2025 through June 2025 with a deficit of 0.85 inches ranking 56th of the 131 years of precipitation data. In addition, water-year-to date precipitation data for the Arkansas River Basin you provided, showed 92% of median as of June 1, 2025. The documented precipitation levels were not severe enough to directly impact irrigated acreage. The evidence does not substantiate conditions consistent with an eligible drought event as defined by 1-NAP subparagraph 51 B and 51 E which require that drought directly impact the covered crop or acreage during the coverage period.

   b. **Prevented Planting Requirements for Drought Not Met**
   Under 1-NAP subparagraph 378 A, 2-CP subparagraph 37 C, and 7 CFR 718.103(d), prevented planting credit due to drought requires:
      - prolonged precipitation deficiencies exceed the D2 level on the U.S. Drought Monitor, and
      - verifiable weather data from recognized sources.

   The U.S drought monitor was not in a D3 status on the final plant date and did not exceed a D1 (moderate drought) level from January 1 through the final plant date for Otero County. Additionally, precipitation data reviewed in item 1a, including nationally recognized NOAA data, does not support the existence of a qualifying drought.

2. **Lack of Irrigation Water is Not an Eligible Cause of Loss**
   Lack of irrigation water alone is not an eligible cause of loss unless it is the result of drought conditions (1-NAP subparagraph 51 A; 7 CFR 1437.10). As noted above, drought was not supported as an eligible cause of loss.

3. **Intent to Plant Not Fully Supported**
Under 2-CP subparagraph 37 B and 7 CFR 718.103(c), producers must demonstrate clear intent to plant the acreage and show that planting was prevented by a natural disaster

event rather than a management decision. Producers must also establish that the acreage would have been planted and harvested absent the natural disaster.

The documentation provided, including historically planted acreage patterns for the unit, does not sufficiently establish:

- field preparation or other evidence of intent to plant, or
- that planting was prevented by a natural disaster rather than a management decision.

Although you stated you had adequate equipment and a market, many of the seed invoices submitted were not to you or any member of the unit and date back as far as 9 years. Additionally, the prevented planted acreage is not consistent with the previously planted acreage on unit 2089.

For cantaloupe Fh Ir, you reported 32.30 prevented planted acres with 0.7218 acres planted in 2025. In prior years: 0.93 planted acres were planted in 2024, none in 2023, 1.98 acres in 2022 and none in 2021.
For peppers ANA Fh Ir, you reported 15.71 prevented planted acres with none planted in 2025. In prior years: 5.13 acres were planted in 2024, 13.36 in 2023 and none in 2021 or 2022.

Additionally, Farm 3212/3063, where unit 2089 is located, consistently had 29.3 acres left open or not planted.

Therefore, intent-to-plant requirements were not met.

4. **Lack of reasonable probability of having adequate water**
Under 7 CFR 718.103(e) producers claiming prevented planting on irrigated acreage must demonstrate a reasonable probability of having adequate water absent an eligible cause of loss to carry out good irrigation practices. Further, 1-NAP subparagraph 51 F states an inadequate supply of irrigation water at the beginning of the planting period for annual crops is an ineligible cause of loss.

In addition, 7 CFR 718.103(f)(9) and 2-CP (Rev. 16) subparagraph 37 D states an inadequate supply of irrigation water before the NAP application closing date through the final planting date of the current year is ineligible. The application closing date for both crops was March 15, 2025. The snow water equivalent data you provided for the Arkansas River Basin indicated: 54% of median as of April 1, 2025, 34% of median as of May 1, 2025 and only 2 reporting points remaining as of June 1, 2025: Fremont Pass at 97% of median and South Colony at 0%, the other 15 points were melted out.

A review of the Actual Production History and Approved Yield records also indicates inadequate water availability. Anaheim peppers were planted in three of the last ten years, all of which were designated disaster years with yields below 65% of the county expected yield. Cantaloupes were planted seven of the past ten years, six of which were designated disaster years: yields were below 65% in five of the seven planted years.

Determination:

After reviewing the case file (Exhibit 1), policy and testimony provided, the STC determined documentation does not establish that the claimed eligible weather-related disaster event occurred during the coverage period or that it directly caused the claimed crop loss as opposed to other circumstances. In addition, the requirements for irrigated prevented planting were not met. Steve Raftopoulos moved to disapprove and uphold the original February 11, 2026, decision to disapprove the CCC-576, Part B notice of loss filed on June 16, 2025, for drought beginning December 20, 2024 and continuing, and apparent on June 1, 2025, for irrigated peppers ANA Fh and irrigated cantaloupe Fh on unit 2089. Furthermore, Steve Raftopoulos moved to disapprove and uphold the April 23, 2026, disapproval of the CCCC-576 Part G through H application for payment filed on December 1, 2025. Joe Petrocco seconded the motion. Motion passed unanimously.

B Equitable Relief – Programmatic Relief – La Plata – 26 Late File Application for Coverage – Daniel Selzer

Janae Rader, Farm Program Specialist, presented the STC with the case file (Exhibit 2) to review and make a determination on the request for Equitable Relief under Programmatic Relief submitted by the La Plata COC on behalf of Daniel Selzer on his 2026 NAP application for coverage.

Background: La Plata County Committee met March 11, 2026, and reviewed a 2026 late-filed NAP CCC-471 Application for Coverage for Daniel Selzer (Producer). They determined that relief was warranted but fell outside of the COC authority. They are recommending programmatic relief on a 2026 late-filed NAP Application for Coverage on Grass NAG Gz, Mixed Forage IGS Gz at 50/55 and Mixed Forage IGS Fg, Mixed Forage GMA Fg at 65/100 coverage levels.

Discussion/Facts:

Producer late-filed the CCC-471 3/10/26 along with the required non-refundable service fee.

It is not likely that a disaster event had affected the crop on 3/10/26 as:
- The perennial crop would just be coming out of dormancy,
- no notice of losses were filed with an event date before 03/10/26 in La Plata County by other producers,
- no STORM report has been filed for La Plata county.

Producer has a history of obtaining NAP coverage by the deadline

- The applicant’s failure to timely file an application for coverage due to being out of State with his significant other for medical reasons was beyond the producer’s control
- Relief would permit coverage to attach March 11, 2026 early enough in the coverage period to eliminate the likelihood that coverage was obtained after a disaster condition occurred.
- The late-filed CCC-471 was not filed after any potential eligible cause of loss or disaster event occurred, which could have impacted the NAP crop regardless of whether or not the applicant has claimed the loss condition or event adversely impacted the crop. No

NOL were filed in La Plata County NAP software with an event date prior to filing the CCC-471, no STORM reports entered.

- COC found the specific reason the applicant was unable to file CCC-471 by the application closing date was due to reasons beyond the producer's control. This was documented in La Plata COC minutes May 11, 2026.

After reviewing the applicable policies and supporting documentation in Exhibit 2, the STC determined that the late filed application for coverage is complete and meets the criteria outlined in 1-NAP paragraph 301 for requesting Equitable Relief under Programmatic Relief and is within the STC authority. Steve Raftopoulos moved to grant equitable relief on the late filed 2026 CCC-471 Application for coverage for Daniel Selzer. Kyle McConnell seconded the motion. Motion passed and relief granted.

C 2027 NCT Colorado Review

1) Asparagus

Janae Rader, Farm Program Specialist, presented the STC with the information in Exhibit 3 to review and make a determination on County Expected Yield (CEY) and Average Market Price (AMP) on Asparagus as recommended in the table below.

2027 STO Approved yield and price

County	Type	IU	Ir/ Ni	UOM	CEY	Price	Organic Yield	Transitional Yield	Organic Market Price	Direct Market Price
Fremont		FH	I	CWT	38.00	$101.23			$145.70	$143.29
Otero		FH	I	CWT	60.14	$101.23	45.11	45.11	$145.70	$143.29
Pueblo		FH	I	CWT	38.00	$101.23	28.50	28.50	$145.70	$143.29

Intended Use Key: CB=cannabidiol, DE= dry edible, FB=fiber, FG=forage, FH=fresh, GR=grain, NT=non-table, OL=oil, PR=processed, SD=seed, SG=silage, SO=sod, TB=table

After reviewing the applicable policies and supporting documentation (Exhibit 3), Joe Petrocco moved to approve the proposed County Expected Yield (CEY) and Average Market Price (AMP) on Asparagus as presented and shown in the table above for the 2027 NCT and to set the Direct Market Price at $143.29 for 2026 and 2027. Steve Raftopoulos seconded the motion. Motion passed.

2) Caneberries

Janae Rader, Farm Program Specialist, presented the STC with the information in Exhibit 4 to review and make a determination on County Expected Yield (CEY) and Average Market Price (AMP) on Caneberries as recommended in the table below.

2027 STO Approved yield and price

County	Crop	IU	Ir/ Ni	UOM	CEY	AMP	Organic Yield	Transitional Yield	Organic Price	Direct Market Price
Delta	BLK	FH	I	CWT	15.50	$273.00	11.63	11.63	$393.10	
Delta	CHT	FH	I	CWT	87.88	$132.54	65.91	65.91	$190.80	
Delta	PAK	FH	I	CWT	8.02	$273.00	6.02	6.02	$393.10	
Delta	RED	FH	I	CWT	37.15	$273.00	27.86	27.86	$393.10	
Delta	TRI	FH	I	CWT	22.92	$124.23	17.19	17.19	$178.80	
Fremont	EVG	FH	I	CWT	27.91	$108.49				
Mesa	RED	FH	I	CWT	37.15	$273.00	27.86	27.86	$393.10	
Pueblo	BLK	FH	I	CWT	13.34	$273.00	10.01	10.01	$393.10	
Pueblo	RED	FH	I	CWT	37.15	$273.00			$393.10	

Intended Use Key: CB=cannabidiol, DE= dry edible, FB=fiber, FG=forage, FH=fresh, GR=grain, NT=non-table, OL=oil, PR=processed, SD=seed, SG=silage, SO=sod, TB=table

After reviewing the applicable policies and supporting documentation (Exhibit 4), Joe Petrocco moved to approve the proposed County Expected Yield (CEY) and Average Market Price (AMP) on Caneberries as presented and shown in the table above for the 2027 NCT. Steve Raftopoulos seconded the motion. Motion passed.

3) **Canola**

Janae Rader, Farm Program Specialist, presented the STC with the information in Exhibit 5 to review and make a determination on County Expected Yield (CEY) and Average Market Price (AMP) on Canola as recommended in the table below.

2027 STO Approved yield and price

County	Crop	Type	IU	Ir/ Ni	UOM	NAP CEY	NAP AMP	Organic Yield	Transitional Yield	Organic Price
Alamosa	CANOLA	SPR	SD	I	LBS	1013	$0.1245			
Conejos	CANOLA	SPR	SD	I	LBS	1013	$0.1245			
La Plata	CANOLA	SPR	SD	N	LBS	704	$0.1245			
Rio Grande	CANOLA	SPR	SD	I	LBS	1310	$0.1245			
Saguache	CANOLA	SPR	SD	I	LBS	1310	$0.1245			
Yuma	CANOLA	FAL	SD	I	LBS	959	$0.1253			
Yuma	CANOLA	FAL	SD	N	LBS	670	$0.1253			
Yuma	CANOLA	SPR	SD	I	LBS	1013	$0.1245			
Yuma	CANOLA	SPR	SD	N	LBS	704	$0.12			

Intended Use Key: CB=cannabidiol, DE= dry edible, FB=fiber, FG=forage, FH=fresh, GR=grain, NT=non-table, OL=oil, PR=processed, SD=seed, SG=silage, SO=sod, TB=table

After reviewing the applicable policies and supporting documentation (Exhibit 5), Steve Raftopoulos moved to approve the proposed County Expected Yield (CEY) and Average Market Price (AMP) on Canola as presented and shown in the table above for the 2027 NCT. Joe Petrocco seconded the motion. Motion passed.

D New Crop Requests

1) Elbert Millet Com Fg Ir

Janae Rader, Farm Program Specialist, presented the STC with the following information in Exhibit 6 to review and make a determination on a new irrigated (Ir) practice for Millet Common (COM) with the intended use of forage (Fg) to be added as a NAP covered commodity for 2026 and succeeding years in Elbert County.

STC determined the crop is not an experimental crop for Elbert County.

2026 STO Approved NCT Data.

PP Factor	UH Factor	Certified Organic Factor	Transitional Organic Factor	Final Planting Date	Normal Harvest Date	Application Closing Date
0.50	.75			08/01	10/15	03/15

Unit of Measure in tons	2019	2020	2021	2022	2023
Yield	1.85	1.28	1.37	1.71	1.30*

* STO recommended yield, COC did not include recommendation.

After reviewing the applicable policies and supporting documentation (Exhibit 6), Steve Raftopoulos moved to approve the Elbert County's request to add a new irrigated (Ir) practice for Millet Common (COM) with the intended use of forage (Fg) as a NAP covered commodity for 2026 and succeeding years in Elbert County as presented, and recommended by the STO shown above. Joe Petrocco seconded the motion. Motion passed.

2) Montezuma – Sorghum Grs Gr Ni

Janae Rader, Farm Program Specialist, presented the STC with the following information in Exhibit 7 to review and make a determination on Sorghum – Grain (GRS) with the intended use of grain (Gr), practice non-irrigated (Ni) to be added as a NAP covered commodity for 2026 in Montezuma County.

STC determined the crop is not an experimental crop for Montezuma County.

2026 STO Approved NCT Data.

PP Factor	UH Factor	Certified Organic Factor	Transitional Organic Factor	Final Planting Date	Normal Harvest Date	Application Closing Date
0.50	0.85			06/15	12/10	03/15

Unit of Measure in tons	2020	2021	2022	2023	2024
Yield	1.0	1.0	1.0	1.0	29

After reviewing the applicable policies and supporting documentation (Exhibit 7), Joe Petrocco moved to approve Montezuma County's request to add Sorghum – Grain (GRS) with the intended use of grain (Gr), practice non-irrigated (Ni) as a NAP covered commodity for 2026 and succeeding years in Montezuma County as presented and recommended by the STO shown above. Steve Raftopoulos seconded the motion. Motion passed.

E NCT – COC Concern – Delta/Montrose & Dolores

Janae Rader, Farm Program Specialist, presented the STC with policy and information in Exhibit 8 and 9 to review concerning the NAP National Crop Table. Delta/Montrose and Dolores County Committees submitted memos to the STC regarding NCT County Expected Yields (CEY) trends for NAP covered crops within their counties over the past few years.

Per 1-NAP paragraph 276, CEY's are set for an eligible NAP crop for the administrative county determined by STC. CEY's established are representative of the normal cultural practices for the county. When setting CEY's, the STC can set multiple CEY's for the same crop based on different farming practices, different types, different intended uses. The county-expected yield should reflect the average production potential of the crop in the county by practice and intended use. CEY's will be based on the best available information provided by multiple sources listed in the handbook. CEY's set by STC must have supporting documentation to justify the CEY or a detailed factual explanation to justify deviations from previously approved crop data.

The NCT software calculates the County Expected Yield (CEY) based on the Olympic average from the most recent 5 years. Using the Olympic Average automatically removes the highest and lowest values, which excludes the one-off disaster years. There is no option to manually limit or remove specific disaster years, and from a policy standpoint, it would not be appropriate to selectively pick and choose only the high-yielding years to determine an average or expected yield.

Each year's data information that is entered into the NCT to calculate the upcoming years CEY should reflect that specific year's production. This data is based on the multiple sources listed in the handbook and must be reflective of that counties and year's production.

Based on the review of policy and documentation provided in Exhibit 7 and previous STC minutes, the STO and the STC set yields based on supporting documentation and is calculating CEY correctly and per policy. STC does not have the authority to choose which years data is used for the CEY nor can they limit a decrease in the CEY. CEY is based on the most recent 5 consecutive years Olympic Average. No STC action taken. STC asks STO to send a memo to the COC's summarizing their review and policy.

4. Conservation Reserve Program (CRP)

A Establishment of additional FY26 CRP Cost Share component and rate

Hunter Cleveland, Farm Program Specialist, presented the STC with the following information in Exhibit 10 to review and make a determination on establishing additional CRP cost share components and rates for 2026.

According to Handbook 2-CRP (Rev. 6) paragraph 495, STC's are authorized to develop state program and C/S policy based on guidelines established within Handbook 2-CRP (Rev. 6). STC's can also establish state rates rather than having COC's establish individual county rates. Colorado STC has elected to continue implementing state rates.

The FY26 Cost Share Rates were established in a previous Colorado STC meeting. However, it was determined that the following, additional cost share component and rate was needed for FY26 and future years:

Component Code	Description	Measurement	Rate	Type of Rate
26COCRP1002	Post Fire-Mulching (Cereal Grain)	Acre	$ 46.00	Not to Exceed

After reviewing the applicable policies and supporting documentation in Exhibit 10 and STC knowledge, Kyle McConnell moved to add the proposed CRP Component as presented with a not to exceed rate of $45.00 as shown above. Darrell Mackey seconded the motion. The motion passed.

5. Emergency Conservation Program (ECP)

A 321 Equitable Relief Request – Misaction/Misinformation – Rio Blanco – ECP Implementation Request

Hunter Cleveland, Farm Program Specialist, presented the STC with the case file (Exhibit 11) to review and make a determination on the request for Equitable Relief-Misaction/Misinformation submitted by the Colorado State Office on behalf for the ECP Implementation request for Rio Blanco County in response to the Crosho Wildfire. If granted, the Colorado State Office also requests that Rio Blanco be allowed to hold an ECP signup for the Crosho Wildfire.

Discussion/Facts:

- The Colorado State Office did not properly informed the Rio Blanco and Routt County FSA offices that a separate ECP implementation request was needed in Rio Blanco County for the Crosho Wildfire specifically.
- ECP Implementation is the sole responsibility of the FSA office and at no fault to the producer.
- Routt County has accepted ECP applications from producers with Routt County administered farms with land physically located in Rio Blanco County.
- If ECP implementation is not approved in Rio Blanco, it will be detrimental to producers in Rio Blanco that were affected by the Crosho Wildfire.

After reviewing the applicable policies and supporting documentation (Exhibit 11), Kyle McConnell moved to recommend DAFP approve the Equitable Relief Request-Misaction/Misinformation submitted by the Colorado State Office for the ECP Implementation request for Rio Blanco County in response to the Crosho Wildfire. Furthermore, if granted, STC also requests that Rio Blanco be allowed to hold an ECP signup for the Crosho Wildfire in accordance with the following:

Required Information	Rio Blanco- Crosho Wildfire Request
ECP Practices Needed	EC1- Debris Removal EC3- Fence Replacement/Repair EC4- Restoring Conservation Structures
Signup Duration	30 days
Estimated Signup Date	July 1- July 30
Estimated Funds Needed	$1,073,000

Darrell Mackey seconded the motion. Motion passed.

B ECP Application Review- Rio Blanco County- S. Robinson

Hunter Cleveland, Farm Program Specialist, presented the STC with the following information in Exhibit 13 to review and make a determination on the ECP application submitted by the Rio Blanco County Committee for Rio Blanco, County producer S. Robinson.

After reviewing the applicable policies and supporting documentation (Exhibit 5), Steve Raftopoulos moved to recommend the ECP-PM approve the ECP application for Rio Blanco County producer S. Robinson. Joe Petrocco seconded the motion. Motion Passed.

C Agriculture Land Market Value Review- Archuleta County

Hunter Cleveland, Farm Program Specialist, presented the STC with the following information in Exhibit 13 to review agricultural market land value established by the Archuleta COC for 2026.

During an action between meetings conducted on May 26 and 27, the Archuleta COC, reviewed and set the 2026 agricultural market land value for Archuleta County at $5,000.00 per acre.

STC reviewed applicable policies and supporting documentation in Exhibit 13. STC concurred. No action required by STC.

6. Otero COC Actions

In accordance with 7 CFR 7.1(c), State committees will take any actions required by these regulations that have not been taken by a county committee. Don Brown, STC Chairperson, will electronically sign the documents for these actions.

A Assistance for Specialty Crop Farmers (ASCF)
Presented by: Dara Belew, Otero/Crowley County Executive Director

The STC reviewed policy (Exhibit 14, section 7.a.1), and the authority the COC has to redelegated in writing, to the CED, to review and approve CCC-556's in routine cases per 1-ASCF subparagraph 5 D and 16-AO, except forms and documents in which CED has a monetary interest.

Routine cases do not include CCC-556's related to acreage report corrections or that have another adjustment that increases acreage

After reviewing Exhibit 14 section 7.a.1, Steve motioned to redelegate to the CED the right to review and approved CCC-556 in routine cases. Darrell Mackey seconded the motion. Motion passed.

B Livestock Indemnity Program (LIP)
Presented by: Dara Belew, Otero/Crowley County Executive Director

STC moved to take the 2025 LIP application (CCC-852) for Emma Richardson from the table. This was tabled during the May 28, 2026 meeting due to additional information submitted and the need to review the documentation and policy.

STC reviewed, application, policy and documentation provided (Exhibit 14, section 7.b.1). STC determined eligible adverse weather **event** requirement for Extreme Cold and Extreme Heat Threshold was not met per 1-LIP subparagraph 22 B and 1-LIP CO Exhibit 3.

Steve Raftopoulos motioned to disapprove the 2025 LIP application for payment (CCC-852) for Emma Richardson. Joe Petrocco seconded the motion. Motion Passed. Application is disapproved.

C Common Management (CM) – Prevent Plant – Not for NAP
Presented by: Dara Belew, Otero/Crowley County Executive Director

The STC reviewed policy, 2026 Notice of Loss, prevent plant acres-Not for NAP (CCC-576), and supporting documentation submitted and presented for multiple producers.

After STC reviewed policy, the 2026 Notices of loss, prevent plant-Not for NAP requests and supporting documentation. See Exhibit 14, section 7.c.2 for details and list of producers who requested prevent plant Not for NAP credit. After reviewing the policy and applications, Steve Raftopoulos moved and Joe Petrocco seconded the motion to approve the 2026 Notice of Loss, prevent plant - Not for NAP requests (CCC-576). Motion passed.

7. Adjournment

There being no further business, the Executive Session was adjourned at 12:17 p.m. The next meeting is scheduled for July 23, 2026, via TEAMs.

Approved:
