

Colorado State Committee Meeting – June 24, 2026

Regular Session Minutes

Meeting Time: 12:18 PM

Meeting Place: Colorado State Office
Denver Federal Center
Lakewood, CO 80225

and Virtual via Teams

Members Present: Don Brown, Chairperson
Kyle McConnell, Member (Via Teams)
Steve Raftopoulos, Member
Joe Petrocco, Member
Darrell Mackey, Member (Via Teams)

Staff Present: Jerry Sonnenberg, State Executive Director
Jon Weishaar, Deputy State Executive Director
Cindy Vukasin, Farm Program Chief
Kim Lacy, Acting Farm Loan Chief
Janae Rader, Farm Program Specialist
Doug Andresen, Farm Program Specialist
Hunter Cleveland, Farm Program Specialist
Woody Woods, District Director
Sam Montoya, District Director

Guests: None

1. Call to Order

The Colorado State Committee (STC) met on June 24, 2026, via TEAMS. Don Brown, State Committee Chairperson, opened the Regular Session at 12:18 PM.

2. Approval of Regular Session Minutes

The STC reviewed the Regular Session minutes from the May 28, 2026, meeting. After due consideration and discussion, Steve Raftopoulos moved to approve and accept the minutes. Joe Petrocco seconded the motion. The motion passed.

3. Leadership Reports (Exhibit 1)

A. State Executive Director Report

Jerry Sonnenberg, State Executive Director, submitted his written report and asked if there were any comments or questions.

B. District Director Reports

District Directors, Scott Brase (District 1), Jon Weishaar (Acting for District 2), Woody Woods (District 3) and Sam Montoya (District 4) gave the STC written reports regarding their specific districts and included information pertaining to programs, staffing updates, weather conditions, and other pertinent information since the last STC meeting.

C. Acting Farm Loan Chief Report

Kim Lacy, Acting Farm Loan Program Chief, provided the STC with a written report of items, events, and pertinent information regarding farm loan and staff since the last STC meeting and was available for questions and comments.

D. Farm Program Chief Reports

Cindy Vukasin, Farm Program Chief, gave the STC a written and oral report of items, events, and pertinent information regarding farm programs and staff since the last STC meeting and was available for questions and comments.

Corey Pelton, Farm Program Chief, gave the STC a written report of items, events, and pertinent information regarding farm programs and staff since the last STC meeting and was available for questions and comments.

E. Deputy State Executive Director Report

Jon Weishaar, Deputy State Executive Director, gave the STC a written report of items, events, and pertinent information since the last STC meeting. He also provided numerous updates since the written report was filed and was available of questions and comments.

4. Risk Management (RMA)

A Consultation 202608R0151 T Yield Change

Janae Rader, Farm Program Specialist, presented the STC with information in Exhibit 2 for STC concurrence on RMAs T-yield changes on wheat for the 2027 crop year. RMA Consultation 202608R0151.

After reviewing the applicable policies and supporting documentation in Exhibit 2, Joe Petrocco moved to concur with RMAs T-Yield changes on Wheat for the 2027 crop year and to designate Janae Rader authority to submit the determination electronically. Steve Raftopoulos seconded the motion. Motion passed.

B Consultation 202608R0155 T Yield Change

Janae Rader, Farm Program Specialist, presented the STC with information in Exhibit 3 for STC concurrence on RMAs revised policy regarding broadcast seeded acreage for barley, canola, wheat and triticale in Colorado for 2027 and subsequent crop years. RMA Consultation 202608R0155.

After reviewing the applicable policies and supporting documentation in Exhibit 3, Steve Raftopoulos moved to concur with RMAs revised policy regarding broadcast seeded acreage for barley, canola, wheat and triticale in Colorado for 2027 and subsequent crop years. Furthermore, to designate Janae Rader authority to submit the determination electronically. Joe Petrocco seconded the motion. Motion passed.

5. Adjourn Regular Session

Having no other business to discuss, the Regular Session meeting was adjourned at 1:45 p.m.

Next STC Regular meeting set for July 23, 2026 via TEAMS.

Leadership Reports

**SED Report
Jerry Sonnenberg
June 17, 2026**

STAFFING:

Since the last report, we have hired 3 PA's and had one that was offered the job, turn it down. Two of the three were already working as SDRP Temps and we are actively trying to replace them.

Thanks to the STC last month, we have posted job opportunities for CED's in both Weld and Mesa/Garfield Counties. Those applications have to be in by June 25. Once we have made offers to fill those positions, we will move back to filling the PA positions. We currently sit at 83 employees which is two less than our ceiling of 85.

On the GS side, we are still at the maximum ceiling of 32 but there are rumors of a couple of retirements. If those indeed come to fruition, we have a hiring plan in place to lessen the burden of being understaffed.

BUDGET:

On the GS side, we have \$53,693 left in travel. I have allocated \$22,000 for Farm Loans to do site visits and training. I have budgeted \$15,000 for STC meetings as it costs around \$5,000 per meeting to hold them at the STO. My plan is still to alternate in person and virtual meetings. I have budgeted \$7,500 for DD travel for Sam. I have added \$1,500 for DD travel to Jon's old district in which Jon and I continue to try and cover. I have allocated 10 nights at \$250 per night or \$2,500 for Chiefs and Specialists to travel. I have allocated 10 overnights for the SED to travel to Outreach events or \$2500 and that leaves a current reserve of \$7192.67.

	FUND 84 - GS	FY25	FY26 Pre-Allot	FY26 Request	FY26 Final	Spent 6/10/2026	Available 6/10/2026

					\$ 46,500.00		
				Reserve	\$ 7,192.67		

EXHIBIT 1

On the CO side, we have \$42,424 left for travel. COC meetings cost and average of \$6,000 per month or \$23,360 for the last four months. However, our entire travel expenditures over the first 8 months only averages \$2,244 a month. That is less than half of what was anticipated. I am trying to figure out why that number doesn't correlate with the budget. I have allocated 12 nights for jump teams at \$250 a night or \$3,000 so that we can send people to other parts of the state that may need help. I plan to bring in all the newest hires for an in-person training in Lakewood. Depending on what I learn regarding the COC travel will determine how many I can bring in. I am still looking at regional trainings that would not be overnight.

WELD COUNTY OFFICE:

We finished moving into the Weld County temporary office on Thursday, May 14

We still don't know when they will award the permanent office space as it was supposed to happen April 1 and did not. I have quickly learned that the Business Center in DC is not efficient nor is it helpful in lease negotiations and finalizations. This is a problem across the country and SED's are seeking change.

POLICY ISSUES:

We continue to work on the prevent plant issue that will be prevalent in Colorado this year with the drought. It will be interesting to see the drought map with the recent rains and the final plant dates sneaking up on us.

STC SUPPORT:

The State Committee continues to monitor the work of COC's and is very engaged in policy. They are working to change policies that fit under their purview such as grazing issues. I am very impressed with this STC and the work they want to accomplish to help producers.

SED THOUGHTS:

Since our last meeting, I have spent quite a bit of time on the road either at Outreach events or visiting offices.

In June I attended the Colorado Livestock Association Annual Meeting as well as the ARS Field Day in Akron. I continue to attend Congresswoman Boebert's staff Ag Roundtables around the state including Elbert County this month. I just returned from visiting the offices in Cortez, Durango and Center while visiting with some producers along the way. I also stopped by the Akron office just to touch base after the ARS Field Day.

I still anticipate the Secretary will visit Colorado and continue to be ready to respond to that request as it has been on again and off again.

I will give the welcome address for the NACS Convention later this month.

On a final note, I received word this morning that Idaho will no longer be giving us administrative assistance. I will continue to work with DAFO for solutions as I don't understand how a smaller state with less loans has more GS staff than Colorado.

**District 1 Update
Scott Brase
June 24, 2026**

Program Updates:

- **ARC/PLC-** There has been an influx of producers inquiring to see if their farms are eligible to receive additional base acreage after receiving the post card notifying them of the potential. Offices are in various stages of completing HIP calculations, Subsequent Acre reviews, and working on farms with deceased producers.
- **NAP-** Offices are seeing some Prevent Plan notices of loss along with crop losses due to drought.
- **CRP-** Offices are working with NRCS to develop Conservation Plans for accepted offers. There have been numerous emergency grazing requests received throughout the district.
- **SDRP 1&2.** Offices are working with producers to get any remaining application information needed to act on any remaining applications.
- **Acreage Certification-** Producers are actively reporting their planted and prevent plant acreage.
- **LFP-** The Livestock Forage Program has triggered now in all counties in the district. Offices are actively taking applications.
- **ELAP-** Several Counties are working on Honeybee losses from Colony Collapse Disorder. There have also been inquiries on feed, water, and livestock hauling due to drought.
- **ECP-** Baca County is working on submitting a request to implement ECP to cover fencing, tanks, debris clean up, and possibly erosion control due to the Sharpe and Ballard fires that started in Oklahoma by lightning and burned into Colorado.

Acreage affected:

4,311.48 acres of CRP – 27 known CRP contracts

6,666.95 acres of cropland

38,590.57 acres of grass (private and federal)

No reported livestock losses and no homes were destroyed.

Staffing Updates:

Both Baca and Prowers PA vacancies interviews were conducted and offers were made in each county. The Prowers candidate declined the offer and there were no other acceptable candidates. The vacancy will be readvertised in September if a position is available.

The Baca PA position was offered to and accepted by Taylor Hund with a start date of July 12th.

Farm Loan

New loan application activity has slowed as field activity increases. Most of the applications continue to be for Farm Ownership loans. Both offices have been busy with servicing activities for producers who are experiencing hardships due to increases in expenses and decreases in income.

Crop Conditions, Livestock, and Weather:

Weather conditions continue to be very dry, windy, and warm over most of the district. There have been a couple of moisture events that brought widespread beneficial precipitation to most of the area, with amounts ranging from a quarter of an inch to over an inch of water.

Wheat harvest began early, however no initial yield or quality reports have been provided yet.

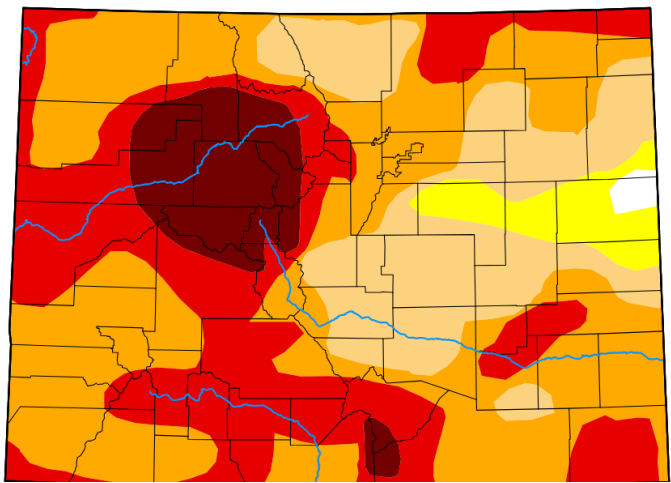

Corn and grain sorghum acreage has been greatly reduced in most areas due to the lack of soil moisture and water availability. Alfalfa and Triticale harvest is well underway with reports of greatly reduced yields.

Livestock is doing well. Native grass pastures are trying to green up with the moisture that has been received but there has been little growth yet. Supplemental feeding continues in most areas.

Hay supplies have tightened greatly with increased hay purchases and reduced yields. There have been reports of heavier than normal culling as a result of drought affected pastures and reduced feed supply.

Drought conditions remain over the district over the past month with some areas improving slightly and some declining. Snowpack continues to be at record lows for the water year with the Arkansas at 15% of normal. Irrigation is relying predominately on water storage with very little river flow.

**District 2 Update
Jon Weishaar
June 24, 2026**

Program Updates:

- **ARC/PLC** – Offices have had an influx of calls following emails and postcards that were sent out by the national office regarding the history dig.
- **CRP** – Offices are working on developing conservation plans with NRCS for the accepted offers. No issues reported thus far.
- **ECP & EFRP** – Funding is coming in for the programs. We anticipate producers with smaller projects will start applying for payments soon.
- **ELAP & LFP** – All District 2 counties have triggered for 2026 ELAP & LFP and applications are starting to come in. The continued administration of these disaster programs is causing a lot of extra workload for the offices. Changes in FSA policy to align with OBBBA are expected to cause additional administrative work as well.
- **SDRP 1&2** – We continue to have problems with the program software pulling in data, but we're working through applications as allowed. Most eligible producers have applied and the program deadline was extended to August 12th.
- **Acreage Reporting** – Acreage reporting is in varying stages in the District. Some offices will be almost done while others are just ramping up. A lot of prevent plant acreage is getting reported.

Staffing Updates:

- No staffing update

Crop Conditions, Livestock, and Weather:

Snowpack is still well below average, still about 12% of median marking one of the lowest levels ever seen at this time of the year. Temperatures are still several degrees above average as well which is accelerating snowmelt and drying soils. Corn and other spring crops are not developing well in many areas. Poor conditions are adding pressure to the offices to implement disaster programs along side the ad-hoc programs. We also saw a record number of new farm loan applications and expect many current borrowers to need servicing as hardships continue.

**District 3 Update
Woody Woods
June 24, 2026**

Program Updates:

- **CRP**– Offices are working with NRCS to develop Conservation Plans for General and Continuous Signups. We are still waiting on results for offers accepted during the Grasslands Signup.
- **ARCPLC** – The opportunity to update base acres has generated many inquiries from producers.
- **Acreage Reporting** – Offices are accepting acreage reports. It has been slow as many NI producers waited on moisture.
- **Prevent Plant** – All offices are accepting prevent plant applications. With the latest clarification, most counties will be able to approve if all criteria is met. Most surface water irrigators have no or reduced water.
- **ASCF** – Signup was a new concept with offices not able to generate applications for the first week, introducing producers to Login.gov. 40 applications have been accepted in District 3.
- **SDRP** – Although signup was extended, most producers have submitted an application.
- **LFP** – All counties are eligible for LFP. With the exception of Weld, signup is slowly progressing as acreage reports are being accepted. Weld currently has 61 applications.
- **ELAP** – Only inquiries have been made to date but applications are expected.
- **Farm Loan** – Workload remains high with both Direct and Guaranteed loans. District 2 has continued to assist Sterling. Normally, we would think loan season was winding down but it has not been seen yet this year.

Staffing Updates:

- **Washington and Yuma both selected permanent employees.**
- **The vacancy announcement for the Expanded CED position in Weld closes June 25.**
- **CED vacancies remain in Phillips and Sedgwick.**
- **The SDRP temps continue to contribute and be critical to serving the producers.**

Crop Conditions, Livestock, and Weather:

Weather remains hot, dry, and windy. A few small areas have received decent moisture but these areas also received hail. Some of it devastated the crop. Wheat harvest has begun in the southern portion of the district. Harvest will be extremely short. Many acres have been released by crop insurance with very low appraisals. Surprisingly, NI corn and millet that was planted looks ok at this time.

**District 4 Update
Sam Montoya
June 24, 2026**

Program Updates:

- 2026 Acreage reporting in progress.
- **2026 NAP** – Counties are wrapping up 2026 APH's and taking 2026 NOL.
- **ASCF** – Small number of producers applied online though farmers.gov, counties are now processing applications.
- **ARC/PLC** – Counties are being inundated with phone calls due to the base acreage postcard.
- **ELAP** – All Counties in District 4 have triggered for ELAP. Counties are processing 2026 ELAP NOL primarily for hay and water hauling.
- **LDP** – County offices are processing wool LDP's.
- **LFP** – All Counties in District 4 have triggered for LFP. Counties are accepting 2026 LFP applications.
- **ECP** – The following County Offices are in the process of implementing ECP: La Plata (flooding), Hinsdale (flooding)

Staffing Updates:

- Mesa CED vacancy opened on June 12th and closes on June 25th.
- Mesa has advertised a temporary position; no applications have been received.
- Garfield has advertised a temporary position; no applications have been received.

Crop Conditions, Livestock, and Weather:

- Western Slope – Hay is getting cut, low yields. Lots of prevent plant. Row crops that were planted are doing ok so far. Public land range is ok; some are not putting livestock out because no drinking water and no way to haul water on some allotments. Some are starting later than normal.
- San Luis Valley – All counties are in D3-D2 drought. Minimal rain fall was received in the valley this month so far. Crops under center pivot are doing well, with a good portion of the flood irrigated crops done for the irrigation season due to no snow pack reserves. Several livestock producers have had their AU numbers cut for the 2026 grazing season on USFS/BLM managed lands.

Hot Topics:

- Prevent Plant
- Drought
- Federal permits are getting reduced time/numbers.
- Hot dry weather with breezy conditions is a concern for wildfire.

Acting Farm Loan Chief's Update
Kim Lacy
June 24, 2026

Colorado Loan Data:

Loan Portfolio: Total loans obligated in FY 2026 (10/1/2025 to 06/17/2026) by service center.

Servicing Office	Direct Loans Obligated	Dollars Obligated	Guaranteed Loans Obligated	Dollars Obligated
Alamosa	19	\$2,456,170.00	2	\$795,000.00
Prowers	32	\$5,011,320.00	2	\$850,000.00
Pueblo	19	\$4,437,000.00	1	\$894,507.00
Adams	14	\$1,787,000.00	0	\$0
Lincoln	11	\$1,118,200.00	0	\$0
Logan	19	\$3,982,300.00	17	\$7,286,500.00
Mesa	11	\$376,400.00	1	\$275,000.00
Montezuma	9	\$1,715,230.00	0	\$0
Total	134	\$20,879,620.00	23	\$10,101,007.00

Hot Topics:

- For both Direct and Guaranteed Loans, the number of loans is down compared to this time in 2025, dollars obligated are also down from 2025. Loan funding for 2026 is expected to be adequate for the anticipated loan needs.
- Leading into July, offices are typically slower this time of year for volume of new applications, although Logan, Prowers and Pueblo service centers continue to see high volumes of applications.
- Routine Servicing: Operational review letters sent to current Borrowers. This info is required to be obtained every 3 years if a loan is performing and there are no additional loan requests.
- Special Servicing: There are options for loan customers during financial stress. If a borrower is unable to make payments on a loan, recommend they contact the local FSA Farm Loan Manager to learn about options.
- Drought continues to be primary concern. Anticipate higher volume of guaranteed and direct applications with reduction of crop yields and liquidation of livestock. Reduced revenues will make it difficult to meet loan obligations, increasing need to assist with refinancing carryover debt.
- Restarting the salary offset for federal employee and consumer debt referrals. STO received a list of borrowers who have been matched as potentially eligible for salary offset.
- FLP Training Updates: Joseph Lujan, Farm Loan Officer in Adams County (Brighton) obtained loan approval authority.
- Vacancies: FLC, Sterling FLOT, Sterling PT/LA, Pueblo PT/LA, Alamosa PT/LA

**Farm Program Chief's Update
Cindy Vukasin
June 24, 2026**

Program Updates:

- **NAP:**
 - PY – 2026:
 - AFC: 2,484 Approved; additional 42 in process (signed by producer or pending).
PY 2025 – 2,516 AFC approved.
 - NOL: 429 filed (Signed by producer); 194 approved; 58 Disapproved
 - PY 2025 payments disbursed: \$3,998,427
- **FBA:** 6,816 payments issued = \$147,153,142; 5 to be disbursed \$13,581 =
Total \$147,166,724
- **ASCF:** 87 payments issued = \$2,865,839; 4 to be disbursed \$22,058 =
Total \$2,887,897
- **LFP:**
 - PY 2025: 1,117 Applications approved; Payments disbursed: \$14,644, 657
 - PY 2026: 203 applications approved, 189 paid = \$1,779,409; 14 to be paid =
\$115,639 = **Total \$1,895,048**
 - PY 2026 Counties that have triggered since last STC meeting

Hot Topics:

- **Prevent Plant:**

Received clarification from national office.

- If any part of the county is in a D3 the entire county will qualify for PP due to drought (all other provisions of 2-CP paragraph 37 must be met)
- The County must be in a D3 according to the Drought Monitor in effect on the final planting date for the specific crop.
- NAP Crop must still meet the criteria mentioned above and the additional criteria/documentation required in 1-NAP.

**Farm Program Chief's Update
Corey Pelton
June 24, 2026**

Program Updates:**ECP**

National office has informed us that Rangeland Planting will be approved for Colorado to utilize for 2025 and 2026 ECP signups in response to areas that need help being reestablished due to drought conditions in order to help mitigate erosion. As of the time of this report, we are still waiting for the official memo from national office, once that memo is received County Offices will be notified.

Payment Limitation/Payment Eligibility

We recently received some guidance on changes to Payment Limitation and Payment Eligibility provisions that will affect program payments. A quick breakdown of the changes:

Payment Eligibility:

Starting with 2026 crop year, FSA will now treat applicable LLCs and S-corps as pass through entities. This will allow each member who meets actively engages in farming criteria the ability to qualify for their own payment limit and expand the number of payments one of these entity types can receive.

Payment Limitation and Attribution:

ARC/PLC payment limitation is increasing from \$125,000 to \$155,00 starting with the 2025 crop year. The payment limitation will be adjusted annually moving forward based on inflation.

Average Adjusted Gross Income:

Producers will now be exempt from the \$900,000 AGI cap for conservation and disaster programs if at least 75% of their average gross income is from farming, ranching, silviculture, which now includes agri-tourism, direct-to/consumer sales, and certain equipment sales. Also, qualified pass-through entities are not required to certify AGI compliance at the entity level, only the members will need to meet the AGI requirements.

Here is a link to the full press release:

<https://www.fsa.usda.gov/news-events/news/06-03-2026/usda-expands-payment-limitation-payment-eligibility-provisions-farmers>

These are very positive changes for our producers, but will create another big workload for our COFs, as they are going to need to review each entity in their office with the producer to see if they meet these new rules and update any additional information for the entity.

Jon Weishaar
June 24, 2026**

Staffing & Hiring

We advertised 4 permanent PA positions in Colorado and selected applicants in Baca, Washington, and Yuma. We have plans to readvertise in Prowers when we are able to again. In the meantime, we've announced Expanded CED positions in Mesa and Weld. As ceiling numbers allow, Jerry and I will work with the DDs to determine which offices need to be prioritized for hiring. As always, we continue to be grateful for the Idaho administrative team as they help us with the advertising, hiring, and onboarding of new employees.

We currently do not have availability to hire any GS employees as we are at our ceiling number according to the model provided to us.

We are also working to fill the various temporary PA positions around Colorado. These positions are currently funded through 9/30/2026.

Budget

Offices have been receiving their supply and equipment orders. The Idaho team is doing a great job of coordinating the remediation of the orders with the local offices. We will monitor the supply and equipment budgets throughout the year to ensure that we don't exceed our allotments.

Travel continues at a good pace. Numerous considerations are made when looking at the travel budget including COC/STC travel, DD travel, trainings, meetings, jump teams, and outreach.

Special Projects

I was able to visit the Moffat and Routt offices this past month to complete DD reviews of ECP, EFRP, and LFP. I'm hoping to visit more District 2 offices this month to provide support where needed and then start expanding my travels to other parts of the State.

I've also been working through the administrative systems and reports I now have access to so I can monitor trends and share meaningful information with the directors and managers to help support them in their roles.

Regular Session

Risk Management Agency (RMA)

RMA Consultation T-Yield Change

Wheat

2027 crop year

State Committee Discussion Record

Program: Risk Management Agency (RMA)

Date: 06.24.26

Staff Member Presenting: Janae Rader, Farm Program Specialist

Matter for Consideration: RMA is requesting STC concurrence of T-yield changes for wheat for the 2027 crop year. RMA Consultation 202608R0151.

STC Recommended Action: concur with all changes and designate Janae Rader authority to submit the determination electronically.

Background: RMA provides FSA STC with a consultation request when they are updating their T-yields. FSA is to review the information and acknowledge the changes.

RMA is recommending the following yields for these crops, types, and practices for 2027 based on past producer production with policies.

Crops with a change in order by % Change:

Discussion:

AD-2006
(04-05-01)

US DEPARTMENT OF AGRICULTURE
Farm Service Agency
State and County Consultation Request
"This information is for USDA internal use only"

1. Tracking Number

(11 Digit Number)*

202608R0151

2. DATE ORIGINATED

6/3/2026

3. ISSUE

(State the issue as briefly as possible)

Attached you will find the Transitional Yields for wheat that have been updated for the 2027 crop year.

CROP YEAR

2027

4. BACKGROUND

(State who does the issue impact; how does the issue impacts you or your constituency?)

Periodically RMA updates it's Transitional Yields which are used for APH purposes.

5. STATE COMMITTEE RECOMMENDATION

(State the committee's recommendation as briefly as possible)

6. JUSTIFICATION

(Fully explain your recommendation)

7A. STATE COMMITTEE MEMEBER'S OR DESIGNEE'S SIGNATURE

7B. DATE SENT TO RMA REGIONAL OFFICE'S POC

8. REGIONAL OFFICE EXPLANATION

FSA Consultation guidelines published in FSA Handbook 4-RM details that the RMA Regional Office provide this information to the FSA State Committee for their review and comment. RMA's published filing schedule established to meet insurance contract deadlines, will not be altered or affected by this review.

9A. REGIONAL OFFICE POC'S SIGNATURE

Akilah Johnson

Specify your own value:

9B REGIONAL OFFICE

☐ Concurred

☐ Non-Concurred

9C DATE SIGNED

6/3/2026

10. RMA REGIONAL OFFICE NAME ADDRESS

(Include Zip Code)

11. STATE OFFICE NAME ADDRESS

(Include Zip Code)

TELEPHONE NUMBER:

TELEPHONE NUMBER:

TRACKING NUMBER (11 Digits alpha numeric)

Digits 1 through 4 identify the calendar year the request is made (i.e., 2001 = 2001).

Digits 5 6 identify the State Location Code (i.e., California = 06).

Digit 7 identifies the origin of the request (F for FSA or R for RMA).

Digits 8 through 11 identify the request number in chronological order (i.e., request number 1 = 0001).

Regular Session

Risk Management Agency (RMA)

RMA Consultation – Revised Policy

broadcast seeded acreage for barley, canola, wheat and triticale

2027 crop year

State Committee Discussion Record

Program: Risk Management Agency (RMA)

Date: 06.24.26

Staff Member Presenting: Janae Rader, Farm Program Specialist

Matter for Consideration: RMA is requesting State Committee (STC) concurrence of revised policy regarding broadcast seeded acreage for barley, canola, wheat and triticale in Colorado for 2027 and subsequent crop years. Consultation: 202608R0155.

STC Recommended Action: concur with all changes and designate Janae Rader authority to submit the determination electronically.

Background: RMA provides FSA STC with a consultation request when they make changes. FSA is to review the information and acknowledge the changes.

RMA has updated their policy on crop eligibility when producers broadcast seed for wheat and triticale.

Added the following statement to all wheat and triticale counties in Colorado:

Any acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, may be insurable if:

- *You request an inspection for the acreage after you incorporate the seed; and*
- *We inspect and give written confirmation that the acreage has an adequate stand to produce the yield used to determine your production guarantee.*

The deadline to request an inspection is no later than 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period.

Insurance will attach to such acreage with an adequate stand on the date the acreage is inspected. Insurance will not attach if an adequate stand is not established within 30 days after the final planting date if no late planting period is applicable or within 30 days after the end of the late planting period.

Deleted the following statement from all barley, canola, and wheat counties in Colorado:

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.

1. Tracking Number

(11 Digit Number)*

202608R0155

2. DATE ORIGINATED

6/4/2026

3. ISSUE

(State the issue as briefly as possible)

RMA created a workgroup team to work on clarifying the broadcast statement across several regions for broadcast wheat. As a result, this statement was added to triticale, canola, barley, and rye when applicable for the State.

CROP YEAR

2027

4. BACKGROUND

(State who does the issue impact; how does the issue impacts you or your constituency?)

Drilled wheat acreage is more consistent in terms of planting depth, spacing, etc.. Broadcast wheat could have inconsistencies in the spreading of the seeds, thus could lead to inconsistencies in yields. This statement was intended to be a means of determining what yield potential could be for wheat.

5. STATE COMMITTEE RECOMMENDATION

(State the committee's recommendation as briefly as possible)

6. JUSTIFICATION

(Fully explain your recommendation)

7A. STATE COMMITTEE MEMEBER'S OR DESIGNEE'S SIGNATURE

7B. DATE SENT TO RMA REGIONAL OFFICE'S POC

8. REGIONAL OFFICE EXPLANATION

FSA Consultation guidelines published in FSA Handbook 4-RM details that the RMA Regional Office provide this information to the FSA State Committee for their review and comment. RMA's published filing schedule established to meet insurance contract deadlines, will not be altered or affected by this review.

TELEPHONE NUMBER:

***TRACKING NUMBER** (11 Digits alpha numeric):

Digits 1 through 4 identify the calendar year the request is made (i.e., 2001 = 2001).

Digits 5 6 identify the State Location Code (i.e., California = 06).

Digit 7 identifies the origin of the request (F for FSA or R for RMA).

Digits 8 through 11 identify the request number in chronological order (i.e., request number 1 = 0001).

FSA Consultations

Colorado

Crop Year 2027

The Topeka RO has ADDED the statement to all wheat and triticale counties in Colorado:

Any acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, may be insurable if:

- *You request an inspection for the acreage after you incorporate the seed; and*
- *We inspect and give written confirmation that the acreage has an adequate stand to produce the yield used to determine your production guarantee.*

The deadline to request an inspection is no later than 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period.

Insurance will attach to such acreage with an adequate stand on the date the acreage is inspected.

Insurance will not attach if an adequate stand is not established within 30 days after the final planting date if no late planting period is applicable or within 30 days after the end of the late planting period.

The Topeka RO has DELETED the statement from all barley, canola, and wheat counties in Colorado:

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.
