

Colorado State Committee Meeting – July 23, 2026

Agenda

Final

Regular Session

Meeting Place:

Virtual Meeting via Teams

[July 23 STC meeting](#)

Phone Conference: (970) 812-0909 ID: 434618184#

Meeting Time:

9:00 a.m. (All times are approximate)

Guests: None Scheduled

1. Call to Order

2. Approve Regular Session Minutes (Action Item)

Presented by: Cindy Vukasin, Farm Program Chief

a. **June 25, 2026**

3. State Executive Director Report (10 min) (Oral and Written separate file)

4. District Director Report (20 min)

- a. District 1: Scott Brase
- b. District 2: Jon Weishaar (Oral)
- c. District 3: Woody Woods
- d. District 4: Sam Montoya

5. Senior Leadership Reports (10 min)

- a. Acting Farm Loan Chief: Kim Lacy
- b. Farm Program Chief: Cindy Vukasin
- c. Farm Program Chief: Corey Pelton
- d. Deputy State Executive Director: Jon Weishaar (Oral)

6. Agricultural Risk Coverage/Price Loss Coverage Program (ARC/PLC)

Presented by: Doug Andresen, Farm Program Specialist

a. 2025 DAFP Yield Solicitation **(30 min)** (Action item) **(Page 15)**

7. State Committee Field Discussion update

8. Adjourn Regular Session (Action Item)

Regular Session

Leadership Reports

District 1 Update
Scott Brase
July 23, 2026

Program Updates:

- **Spring Acreage Reporting-** Offices have been working to certify all spring planted crops by the July 15th deadline. Many producers were delayed in the ability to certify until after the final planting date due to prevented planting. This, along with reduced staff numbers and network issues, has inhibited offices from being able to meet the certification deadline. Acreage Certification Registers from every office in the district have been requested for additional time to complete the backlog.
- **NAP-** Offices are working through Prevented Planting loss claims as well as numerous crop loss claims due to drought, hail, high heat, and wind. Produce crops have been hit hard with multiple hail events.
- **CRP-** Offices are working to notify producers of the status of the Grassland CRP offers. They will continue working with the producers and NRCS to develop Conservation Plans for accepted offers.
- **LFP-** The Livestock Forage Program has triggered now in all counties in the district. Offices are actively taking applications.
- **ELAP-** Several Counties are working on Honeybee losses from Colony Collapse Disorder. There have also been inquiries on feed, water, and livestock hauling due to drought. There is also interest in the program due to wildfire losses.
- **ECP-** Baca County continues to work with producers to determine needs to submit a request to implement ECP to cover fencing, tanks, clean up, and possibly erosion control due to the Sharpe and Ballard fires that started in Oklahoma by lightning and burned into Colorado.

Aspen Acres Fire- The fire is still active at the time of this report and has burned in excess of 100,000 acres. The Pueblo/Fremont office has been working to provide FSA program information to all producers. There have been many miles of fence destroyed, pasture and feed losses, and early reports of livestock deaths. There will likely be substantial influx of producers as losses are determined and finalized.

Staffing Updates:

There is no current hiring announcements open for the district currently.

Farm Loan

New loan application activity continues to be low, with producers holding off on making capital purchases. Both offices remain busy with servicing activities for producers who are experiencing hardships due to increases in expenses and decreases in income. An increase in late payments has been noticeable as well as bankruptcy filings.

Crop Conditions, Livestock, and Weather:

Weather conditions continue to be very dry, windy, and warm over most of the district. There have been a couple of moisture events that brought widespread beneficial precipitation to most of the area, with amounts ranging from a quarter of an inch to two inches in some places.

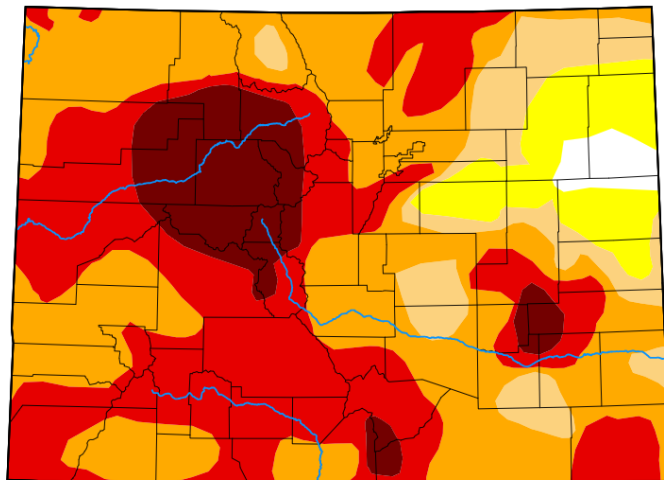

Corn and grain sorghum is starting to stress in many areas due to lack of water. Many canal systems are now dry due to the drop in river flow and available reservoir storage has been used. Moisture events in many areas have been accompanied by hail, which has done substantial damage to crops. Forage crops continue to show stress and reduced yields.

Livestock is doing well overall. Native grass pasture conditions vary greatly based on precipitation received.

Hay supplies remain very tight as many livestock producers are currently feeding as well as trying to purchase their winter feed needs. There have been reports of heavier than normal culling because of drought affected pastures and reduced feed supply.

Drought conditions have improved slightly in a few areas and have worsened in others. The entire district remains in drought conditions ranging from D1 to D4.

July 15, 2026

Intensity

- ☐ None
- ☐ D0 (Abnormally Dry)
- ☐ D1 (Moderate Drought)
- ☐ D2 (Severe Drought)
- ☐ D3 (Extreme Drought)
- ☐ D4 (Exceptional Drought)
- ☐ No Data

Authors

United States and Puerto Rico Author(s):

[Curtis Riganti](#), National Drought Mitigation Center

**District 3 Update
Woody Woods
July 23, 2026**

Program Updates:

- **CRP**– Offices are working with NRCS to develop Conservation Plans for General, Continuous, and Grassland Signups.
- **ARCPLC** – Counties are working on establishing Historical Irrigated Percent (HIP)
- **Acreage Reporting** – Several offices ended up with registers. The largest registers are in Kit Carson and Weld Counties.
- **Prevent Plant** – All offices are accepting prevent plant applications. At this time, I do not have a number submitted but it will be large. We also have a large number of failed crop applications. Drought, freeze, and hail are the primary causes.
- **ASCF** – Applications continue to be accepted and approved as quickly as possible.
- **SDRP** – Although signup was extended, most producers have submitted an application.
- **LFP** – All counties are eligible for LFP. With the exception of Weld, signup is slowly progressing as acreage reports are being accepted. Weld currently has 84 total applications.
- **ELAP** – Only inquiries have been made to date but applications are expected.
- **Farm Loan** – Workload remains high with both Direct and Guaranteed loans. District 2 has continued to assist Sterling. I have been assisting as I can and we are slowly making progress.

Staffing Updates:

- The Weld COC will be conducting CED interviews the week of July 27.
- CED vacancies remain in Phillips and Sedgwick.
- The SDRP temps continue to contribute and be critical to serving the producers. It was appreciated that they were extended to 12/31/26.
- Weld PA, Molly Patton, has announced her resignation to obtain her Masters Degree.

Crop Conditions, Livestock, and Weather:

Weather is hot and windy but a good portion of the District has received moisture recently. The middle of the district has fared better than the NE and NW. Some of the moisture was in excess and was accompanied by hail. This was the poorest wheat harvest in many years. Many acres were unharvested. Native grass pastures have responded well to the moisture with warm season sandhill grasses almost back to normal production.

Hot Topics:

Network and printer issues are being experienced in all counties. The problem is exacerbated in Weld by the wireless network being utilized. It does not have enough bandwidth for the number of users. It is so poor that a speed test cannot be run. All but two employees worked from the Fort Collins office to be able to get some work done and it was hoped that would free up bandwidth for those two who remained. It made little difference. On a positive note, a permanent lease was awarded for Weld with meetings being held to order furniture and with IT.

District 4 Update
Sam Montoya
July 23, 2026

Program Updates:

- **2026 Acreage reporting** – deadline was July 15th. 11 County Offices requested a register to complete acreage reporting. 7 of those offices request an additional week extension to the register.
- **2026 NAP** – Counties are processing 2026 NOL and scheduling loss adjusters to complete appraisals.
- **ASCF** – Counties are processing applications.
- **ELAP** – Counties are processing 2026 ELAP NOL and applications for payment primarily for hay and water hauling.
- **LDP** – County offices are processing wool LDP's.
- **LFP** – Counties are processing 2026 LFP applications.
- **ECP** – Dolores County is preparing a request to implement ECP due to fire.
- **SDRP** – Counties are trying to wrap up SDRP Stage 1 and 2

Staffing Updates:

- Interviews were conducted for the Mesa CED vacancy on July 20th.

Crop Conditions, Livestock, and Weather:

- **Western Slope** – Hay is getting cut, low yields. Lots of prevent plant. Row crops that were planted are doing ok so far. Public land range is ok; some are not putting livestock out because no drinking water and no way to haul water on some allotments. Some are starting later than normal.
- **San Luis Valley** – All counties in the Valley remain in D2-D4 drought conditions with very little precipitation recorded. Center pivot irrigate crops are doing well, most flood irrigated crops are done for the season due to no snowpack.

Hot Topics:

- Network and Printer issues.
- Wildfires
 - Snyder Fire – 30,202 acres – 98% contained – Mesa County
 - Ferris Fire – 64869 acres – 43% contained – Dolores County
 - Gold Mountain Fire – 36965 acres – 12% - Ouray County
 - Beehive Fire – 4728 acres – 97% contained – Rio Arriba County

Acting Farm Loan Chief's Update
Kim Lacy
July 23, 2026

Loan Portfolio: Total loans obligated in FY 2026 (10/1/2025 to 07/16/2026) by service center.

Servicing Office	Direct Loans Obligated	Dollars Obligated	Guaranteed Loans Obligated	Dollars Obligated
Alamosa	20	\$2,466,170.00	2	\$795,000.00
Prowers	34	\$5,260,820.00	2	\$850,000.00
Pueblo	21	\$5,308,360.00	3	\$1,833,551.00
Adams	16	\$1,863,000.00	0	\$0
Lincoln	16	\$1,523,700.00	0	\$0
Logan	20	\$4,147,050.00	20	\$8,654,803.00
Mesa	12	\$533,900.00	1	\$275,000.00
Montezuma	10	\$2,115,230.00	0	\$0
Total	149	\$23,218,230.00	28	\$12,408,354.00

Hot Topics:

- For Direct loans, the number of loans and total amount obligated is still down compared to this time in 2025. Total number of guaranteed loans approved has now exceed the 2025 numbers at this point in the year, however amount of total dollars obligated for guaranteed loans remains lower than July of 2025.
- Between direct and guaranteed loans combined, there was increase of \$4,645,957 in funds approved over the last 30 days in Colorado.
- Loan funding for 2026 is expected to be adequate for the anticipated loan needs.
- Focus at this time of year is typically on special and routine servicing of existing borrowers.
- Routine Serving: Operational review letters sent to current Borrowers. This info is required to be obtained every 3 years if a loan is performing and there are no additional loan requests.
- Special Servicing: There are options for loan customers during financial stress. If a borrower is unable to make payments on a loan, recommend they contact the local FSA Farm Loan Manager to learn about options. Drought and fires continue to be primary concern.
- Restarting the salary offset for federal employee and consumer debt referrals. STO received a list of borrowers who have been matched as potentially eligible for salary offset.
- FLP Training Updates: No significant changes/updates.
- Vacancies: FLC, Sterling FLOT, Sterling PT/LA, Pueblo PT/LA, Alamosa PT/LA

Farm Program Chief's Update
Cindy Vukasin
July 23, 2026

Program Updates: As of Friday, July 17, 2026

- **FBA:** 6,883 payments issued = \$147,630,998; 5 to be disbursed \$55,845 =
Total \$147,686,843
- **ASCF:** 305 payments issued = \$7,815,866; 4 to be disbursed \$153,197 =
Total \$7,969,063
- **NAP**
 - PY – 2026: 2,484 Applications for coverage approved (AFC) additional 42 in process (signed by producer or pending). PY 2025 – 2,516 AFC approved.
 - PY 2025 payments disbursed: \$3,998,427
- **LFP**
 - PY 2025: 1,117 Applications approved; Payments disbursed: \$14,644, 657
 - PY 2026: 391 payments issued = \$3,772,008; 50 to be disbursed \$178,129 – **Total \$3,950,137**
 - PY 2026 Counties and crops that have triggered since Junes report:

- **Organic Certification Cost Share Program (OCCSP)**
 - Sign up announced July 2 – accepting applications starting on July 6
 - Producers and handlers are eligible to receive 75% of the costs, up to \$750 for each of the following scopes: crops, wild crops, livestock, processing/handling and state organic program fees.
 - Sign up for 2025 and 2026 program years
 - Organic producers and handlers have until Dec. 31, 2026 to submit applications
 - Payments will be made as applications are received until funds are depleted.
- **ARC/PLC Data**
 - <https://www.fsa.usda.gov/resources/programs/arc-plc/program-data>
(include pricing and crop lists)

- **Acreage Reporting – State summary – as of July 17, 2026**

Farms with an ACTIVE Acreage Report	Farms Fully Reported 2026	Farms Fully Reported 2025	2026 % fully reported acreage reports	Crop Records Reported 2026	Crop Records Reported 2025	2026 % crops
29,508	25,672	29,619	86.67%	209,066	221,292	94.48%

- **Tree Assistance Program (TAP) – OBBA/WFTCA changes**

- Removed the requirement for producers to meet the 15% mortality above Normal Mortality.
- Producers are only required to meet normal mortality before a payment will trigger.
- Colorado Normal Mortality rates are in CO 1-TAP (Rev. 4) -subparagraph 152

Kind	Normal Mortality
Christmas Trees	3.00 %
Fruit Trees/Vines	1.00%
Nursery – Container	3.00%
Nursery – Field	3.00%

- Increased the reimbursement rate for re-establishments –
 - Reimbursement went from 50% to 65% of actual cost for re-establishments
 - Subparagraph 154C – Re-establishment – pruning, removing, and other costs incurred to salvage existing trees or, in the case of tree mortality, to prepare the land to replan the trees
 - Reimbursement for replanting was and will continue to be 65%
- Extended completion timeframe.
- Now have 24 months to complete practices with ability to grant a 12-month extension at the State Level. –
 - Anything over the total 36 months (24+ additional 12) can still be granted by DAFP if it was out of the producers control.
 - Par 153B – have x months from the date the CCC-899 is approved.
 - Was 12 months from the date the CCC-899 is approved. This will be changed to 24 months

Hot Topics:

- Prevent Plant
- Workload
 - Crop Reporting
 - Farm Records changes/recons
 - ARC/PLC Base allocation
 - LFP – Drought
 - NAP – Drought / Natural Disasters

**Farm Program Chief's Update
Corey Pelton
July 23, 2026**

Program Updates:

Payment Eligibility:

In last month's report I provided information on the new payment eligibility rules. Starting with 2026 crop year, FSA will now treat applicable LLCs and S-corps as pass through entities. This will allow each member who meets actively engaged in farming criteria the ability to qualify for their own payment limit and expand the number of payments one of these entity types can receive.

Just wanted to put this information in the report again, this will be a significant workload for county offices. County offices are to review and update all entities on file in their office to verify if they meet one of these categories or if they need to remain as previously filed.

Conservation:

Grassland CRP Accepted/Rejected list was received July 7. Colorado had another good round of accepted offers. County offices are now working with NRCS to get conservation planning completed and contract offers finalized in the system.

For Grassland CRP offers, conservation plans are due back to FSA no later than September 18, 2026. Also, for Grassland, Interim Conservation Plans have been authorized, these are also due back by September 18, if being utilized. If Interim Plans are being utilized, final conservation plans must be returned to FSA by December 31, 2026.

SDRP

The August 12 deadline for all SDRP programs is fast approaching, COF are working on finishing up the last of the applications. A new RMA Data change report was issued a week ago which will help offices finalize some of the applications that may have been lingering.

SDRP Colorado Payments (as of 7/16):

Stage 1 - \$201,885,086

Stage 2 - \$18,352,111

Quality - \$11,088

Total: \$220,248,285

Regular Session

Agriculture Risk Coverage/Price Loss Coverage (ARCPLC)

Missing ARCPLC Yields for Crop Year 2025

State Committee Discussion Record

Program: Agriculture Risk Program and Price Loss Program (ARC/PLC) **Date:** 07.23.26

Staff Member Presenting: Doug Andresen, Farm Program Specialist

Matter for Consideration: Review and determine missing ARC-CO yields

Background: The National Office has asked State Committees to update missing yields by county for Crop Year 2025. Crops included are corn, flaxseed, grain sorghum, peanuts, and sunflower seed. The information for review can be found in Exhibit 1.

- For ARC-CO the 2025 county yield is computed and used where the farm tract is physically located:
 - ❖ To calculate a current year ARC-CO revenue loss, if applicable.
 - ❖ As the 2025 county benchmark yield to establish ARC-CO benchmark and guarantee revenues.

The 2025 county yields for the 22 covered commodities are used for the ARC-CO and ARC-IC programs and have been compiled using Risk Management Agency (RMA) and National Agricultural Statistics Service (NASS) data when available.

However, there are instances when the 2025 county yields are not available from RMA or NASS. In those instances, State Committee's (STC's) are required to research and establish 2025 yields for the counties missing yield data.

1-ARCPLC policy:

134 Other Yield Information

A STC Calculated Yields where RMA or NASS County Yield Data is Missing or NASS County Yield Data is Not Representative

In certain situations, RMA or NASS county yield data is not available or NASS county yield data does not represent the actual county yield. In order to establish either the benchmark--* yield or actual year yield, STC's must establish a county yield(s) in any year where the yield was not attainable, using the best available information, such as:

- yields from a contiguous county
- NAP yields that were established for the covered commodity
- in cases where STC's cannot find supporting yield data, STC can request the local COC to provide information/documentation at the local level that can be submitted and reviewed by STC
- State or district level NASS data
- State yield data from contiguous States.

Note: Some counties and covered commodities have been designated as both an irrigated and non-irrigated county (HIP). For these counties, STC's are required to provide both irrigated and non-irrigated yields. For other counties and covered commodities, yields are not broken out between irrigated and non-irrigated practices and are designated as "All".

When completing the yield for each covered commodity and year, the State Office **must** provide the county yield (that is 100 percent of the county yield).

134 Other Yield Information

B Missing T-Yields

T-yields are used as the substitute yield for low yields in the benchmark years for ARC-CO and ARC-IC. FSA presently has T-yields that are the weighted T-yields from RMA for covered commodities that were insured in the applicable county in the applicable year. When the covered commodity did **not** have crop insurance in the county in the year in question, the STC will be requested to assign a NAP T-yield that covered commodity in that county.

STC will first assign the NAP T-yield for the covered commodity in that county, as applicable. For counties that have both IR and NI yield data, STC will determine a T-yield for both practices. In cases where STC did **not** determine a NAP T-yield for the covered commodity or county, STC must follow policy in 1-NAP to establish a NAP county-expected T-yield for that covered commodity and county.

T-yields computed according to the policy in 1-NAP and used solely in the ARC and PLC programs are **not** required to be loaded into NCT.

STC's will be contacted by the National Office in any year where a missing yield or T-yield is required to complete the ARC-CO or ARC-IC benchmark and/or actual revenue.

STC assigned yields for calculating payments:

- Year specific yields (2025) will be used to calculate 2025 payments by multiplying the Actual Yield (RMA, NASS, or STC) x the 2025 National Price.

State Name	County Name	Sub Cou	Crop Name	Unit	ARC-CO Yield Designation	(county yield or 80% of T)	(county yield or 80% of T)	(county yield or 80% of T)	(county yield or 80% of T)	(county yield or 80% of T)
Colorado	Adams		Grain Sorghum	Bushel	All	38.86	21.40	22.05	20.84	30.93
Colorado	Arapahoe		Grain Sorghum	Bushel	All	39.33	16.80	20.93	17.24	33.00
Colorado	Baca		Grain Sorghum	Bushel	Irrigated	85.95	61.40	67.50	68.46	68.75
Colorado	Baca		Grain Sorghum	Bushel	Nonirrigated	44.25	21.35	28.85	21.13	22.62
Colorado	Bent		Grain Sorghum	Bushel	Irrigated	68.99	59.31	77.45	63.58	70.72
Colorado	Bent		Grain Sorghum	Bushel	Nonirrigated	38.30	15.20	37.77	31.00	25.00

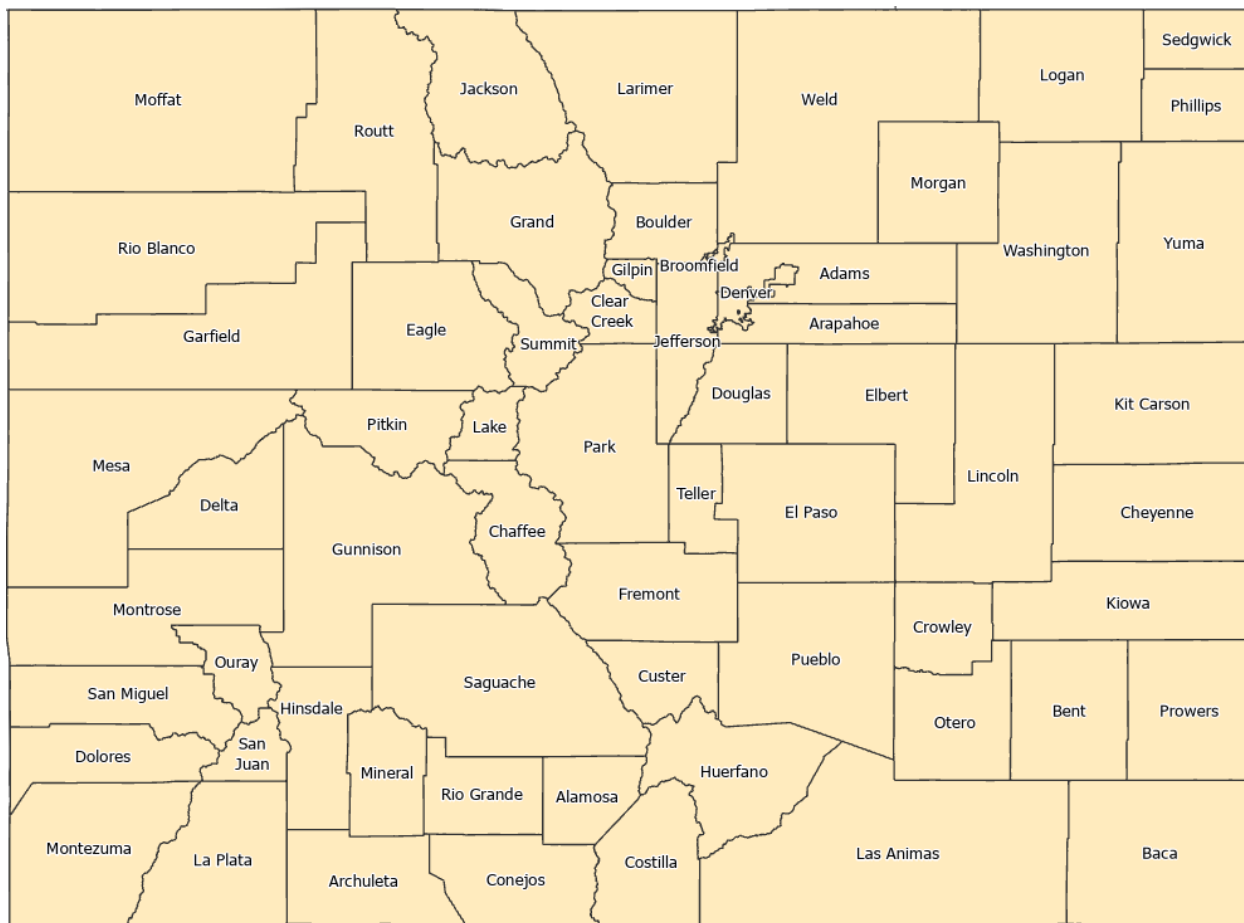

2025 Bench Mark (2019-23 olympic a ▾)	2025 Bench Mark Price (2019-23 olympic a ▾)	2025 Benchmark Revenue ▾	2025 Guarantee Revenue ▾	2025 Maximum Payment Rate ▾	2025 Actual Yield ▾	2025 National Price ▾	2025 Actual Revent ▾	2025 Formula Payment Rate ▾
24.79	\$5.3000	\$131.39	\$113.00	\$13.14				
23.72	\$5.3000	\$125.72	\$108.12	\$12.57				
68.24	\$5.3000	\$361.67	\$311.04	\$36.17				
24.27	\$5.3000	\$128.63	\$110.62	\$12.86				
67.76	\$5.3000	\$359.13	\$308.85	\$35.91				
31.26	\$5.3000	\$165.68	\$142.48	\$16.57				

- The STC is completing 2025 yields, which will be used for the 2025 program year benchmark yield, using yields from 2019-2023
- The yields assigned to each crop, for each county, by the STC will be used as the county yield. Which will then be used to calculate the benchmark yield
- STC will also assign T-yields, if not already established by RMA.
- If needed 80% of the T-yield will be used as a substitute yield
- If the substitute yield is greater than the County Yield, the substitute yield will be used in the benchmark calculation (80% of T-yield)

Grain Sorghum					
Yield <u>1</u> /	90	40	75	80	99
ARC Substitute Yield <u>2</u> /	60	60	60	60	60
MYA Price <u>3</u> /	\$3.22	\$5.02	\$5.99	\$6.33	\$4.25
Reference Price <u>4</u> /	\$3.95	\$3.95	\$3.95	\$3.95	\$3.95

- The benchmark yield is calculated using the Olympic average for the 5 crop years preceding the year prior to the program year.
ie: 2025 program payments will use yields from 2019 – 2023

Action Requested: The State Committee will review the missing yields for each county, along with the applicable policies and supporting documentation, and determine the appropriate yield to be entered. It is recommended that the yields are approved as presented.

Established RMA Yield - Must Remain

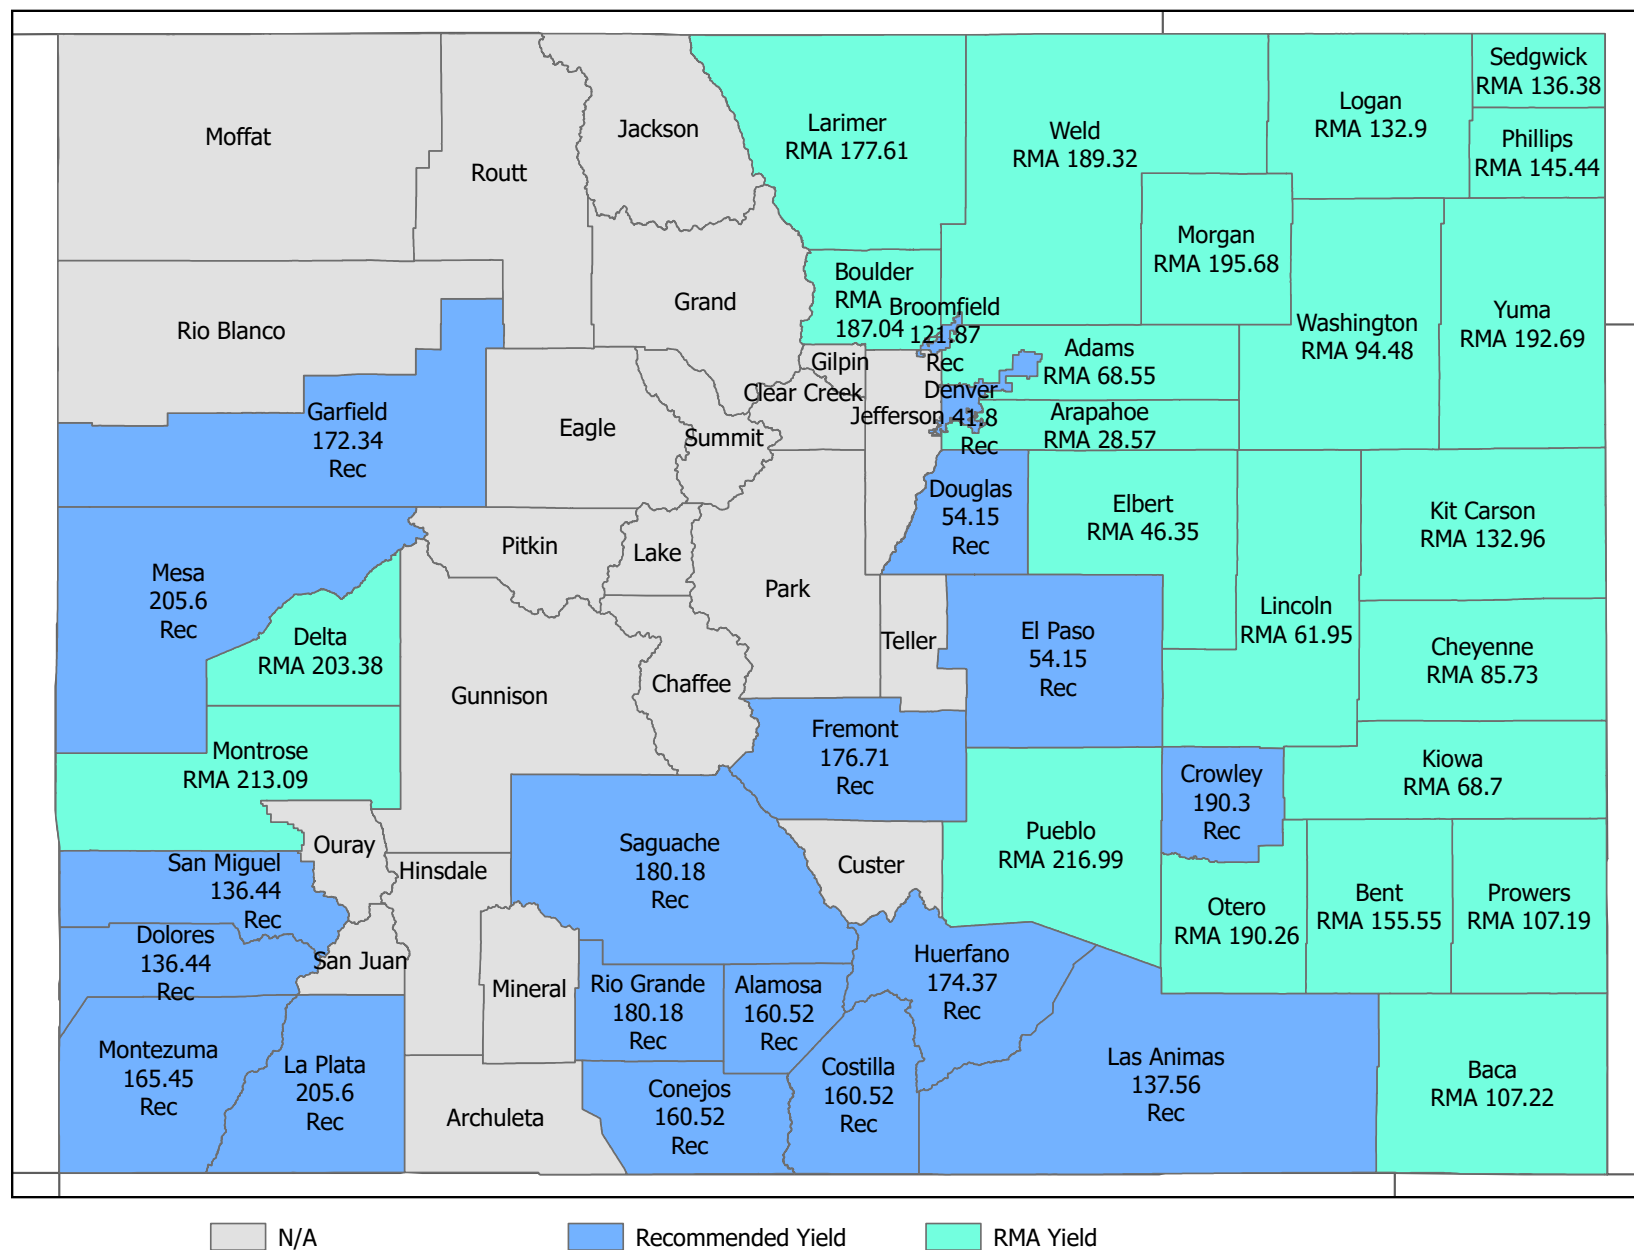

Yield Recommendation - STC Determined Yield Needed
